ClearGlaze™ Doorset

ClearGlaze is the only totally frameless double glazed door on the market. Without the need for a frame, the door is sealed using double nitrile swipes around the perimeter providing a completely flush front façade which is fully insulated for low U-values. The glass can incorporate any coating from any of the world's leading glass manufacturers enabling you to achieve the superior aesthetic result that you require.

Product Features

This doorset is perfect for use as an external entrance in both residential and commercial buildings. It has the flexibility required to fill full size openings and an additional overpanel can be used for higher façades when required. The doorset is also fully DDA compliant as it can be used in conjunction with low thresholds.

The heavy duty floor spring makes manual operation easy, even at the full height and width of 2500mm x 900mm, and the hold open facility at 90 degrees ensures you can use the door just as you need to.

With its dual point locking system, the door is totally secure. The full height pull handles have a locking mechanism at both the top and the bottom of the door, and with 35mm glass you are fully protected.

Technical Specification

Frame Jointing:

Door is sealed using double nitrile swipes.

Tolerances:

Tolerances are +/- 3mm.

Dimensions:

Min - 750mm x 1900mm
