

## **AccentHansen opens the door on new FastTrack Service**

### ***Perfect for pressing deadlines and tight budgets***

3 June 2008 – AccentHansen, one of the UK's market-leading steel door manufacturers and installers, is pleased to announce the launch of its new FastTrack Service.

AccentHansen has been making steel doors for almost 40 years and its new FastTrack Service offers a wide selection of doors in a variety of colours - from order to completion in just 10 days. What's more, AccentHansen is so confident in its ability to deliver the orders ontime that the delivery date is guaranteed or customers will be given a 5% refund.

Customers can choose from single and double door configurations and various hardware, vision and ventilation options are available to suit requirements.

Mark Mallen, Managing Director, AccentHansen, said "At AccentHansen our focus is on great products and outstanding service. Over the last 12 months we have invested a lot of time in ensuring that our customers recognise and receive this and as a result have received some fantastic feedback. Our new FastTrack Service has been developed in response to customer requirements and we are really pleased with the results. FastTrack basically means that you can get steel doors in just 10 days from order which in today's competitive environment can make a big difference to the successful delivery of a construction project."

Darren McDonald, McGill Services, Site Manager for the Fiddlers Ferry Power Station added: "AccentHansen provided us with an excellent service. They dealt with our all needs both efficiently and effectively. They are a very professional company – both the quality of their products and their service delivery reflects this."
